EXPERIENCE

2018 JULY – NOW

ANGULAR DEVELOPER, NUAGE LTD.

My Responsibilities:

- Sitebuild according to UI specs
- Creating UI components
- Developing visual elements, charts, graphs
- Collecting data about user behavior using Google Analytics
- Supporting, refining and suggesting improvements to the current codebase

Some projects that I worked on:

- barcraft.eu
- otpfayalapitvany.hu
- kapcsoljegybol.hu/mobilalkalmazas
- epds.hu
- taskfit.com

Technologies that I used:

- Angular 2+, Angular.js, Angular CLI, Typescript, Javascript, ES6, RxJs, HTML5, Sass, Bootstrap, jQuery, Gulp.js, Treant.js, Git, GitHub, GitLab, Google Analytics

2017 AUGUST – 2018 JULY

UI DEVELOPER, NNG LLC.

My Responsibilities:

- Redesign and implement the UI Flow of a navigation system
- Implement new UI features like guidance pointers, warning settings, language support, menu elements, animations
- Maintain and develop a large codebase
- Fixing bugs, performance issues

The project that I worked on:

- nng.com/navigacio

Technologies that I used:

- Lua, UIML, CSS, JIRA, Mercurial, SVN

2016 OCTOBER – 2017 AUGUST

R&D ENGINEER, NOKIA SOLUTIONS AND NETWORKS LTD.

My Responsibilities:

- Creating UI components
- Fixing bugs, developing features both in frontend and backend
- Writing automated & unit tests
- Planning the new features with the team

The project that I worked on:

- An internal web-based application, which helps engineers to see through their workflow and complete faster their tasks. The application also designed to complete many administrative tasks instead of the engineers.

Technologies that I used:

- React.js, Redux, Typescript, Node.js, Bootstrap, Gulp, Selenium, Git
